**Trade name:** VORONA Rubbing Alcohol

**Company standard:** SF BT 03/2009

**Product description:** it is a disinfectant for external use with bactericidal and yeast action intended for use in health units. The active substance is ethanol (ethyl alcohol) CAS 64-17-5.

**User category:** Professional

**Scope of application:**

- **TP1:** Human Hygiene
- **TP2:** Disinfectants and algacides not intended for direct application to humans and animals;

**Application areas:**

- **TP1:** *Hygienic hand disinfection by friction with bactericidal and yeast action;*
- **TP2:** *Disinfection of surfaces by wiping with bactericidal and yeast action.*

**THE PRODUCT IS INTENDED FOR USE IN HEALTHCARE FACILITIES.**

**Conditioning form:** Ready-to-use liquid

The product is approved by the National Commission for Biocidal Products within the Ministry of Health **Approval no. 154BIO/01-02/12.24**

**Composition:**

- ethyl alcohol denatured with ethyl salicylate and methylene blue;
- softened water.

**Physicochemical properties:**

No.	Feature	Conditions of admissibility
1.	Active substance concentration % vol., 20° C	70 %
2.	Aspect	Clear liquid, slightly blue colour, no sediment or impurities in suspension, with a characteristic smell of ethyl alcohol and salicylate.

**Efficacy:** According to Approval no. 154BIO/01-02/12.24.

**Directions for use:**

Application method	Working solution concentration/application dose	Time of action
Hygienic hand disinfection by rubbing with bactericidal and yeast action	undiluted (as such) / 10 ml	1 minute
Disinfection of surfaces by wiping with bactericidal and yeast action	undiluted / as such	1 minute
